

MBX Biosciences Announces Closing of Upsized Initial Public Offering, Including Full Exercise of Underwriters' Option to Purchase Additional Shares

September 16, 2024

CARMEL, Ind., Sept. 16, 2024 (GLOBE NEWSWIRE) -- MBX Biosciences, Inc. (Nasdaq: MBX) ("MBX Biosciences"), a clinical-stage biopharmaceutical company focused on the discovery and development of novel precision peptide therapies for the treatment of endocrine and metabolic disorders, today announced the closing of its previously announced upsized initial public offering of 11,730,000 of its common stock at a price to the public of \$16.00 per share, which includes 1,530,000 shares issued upon the exercise in full by the underwriters of their option to purchase additional shares of common stock in the offering. The aggregate gross proceeds to MBX Biosciences from the offering were approximately \$187.7 million, before deducting underwriting discounts and commissions and offering expenses.

The shares began trading on the Nasdaq Global Select Market on September 13, 2024 under the ticker symbol "MBX".

J.P. Morgan, Jefferies, Stifel and Guggenheim Securities acted as joint book-running managers.

About MBX Biosciences

MBX Biosciences is a biopharmaceutical company focused on the discovery and development of novel precision peptide therapies for the treatment of endocrine and metabolic disorders. MBX Biosciences was founded by global leaders with a transformative approach to peptide drug design and development. Leveraging this expertise, MBX Biosciences designed its proprietary Precision Endocrine Peptide™, or PEP™, platform to overcome the key limitations of unmodified and modified peptide therapies and to improve clinical outcomes and simplify disease management for patients. PEPs are selectively engineered to have optimized pharmaceutical properties, including extended time-action profiles and consistent drug concentrations with low peak-to-trough concentration ratios, consistent exposure to target tissues, and less frequent dosing. MBX Biosciences is advancing a pipeline of novel candidates for endocrine and metabolic disorders with clinically validated targets, established endpoints for regulatory approval, significant unmet medical needs and large potential market opportunities. MBX Biosciences' pipeline includes its lead product candidate MBX 2109, in Phase 2 development for the treatment of chronic hypoparathyroidism; MBX 1416, in Phase 1 development for the treatment of post-bariatric hypoglycemia; and an obesity portfolio that includes MBX 4291, as well as multiple discovery and pre-clinical candidates in development for the treatment of obesity. MBX Biosciences is based in Carmel, Indiana.

Cautionary Note Regarding Forward-Looking Statements

This press release includes certain disclosures that contain "forward-looking statements," including, without limitation, statements regarding MBX Biosciences' focus on the discovery and development of peptide therapies and design of its PEP Platform. Forward-looking statements are based on MBX Biosciences' current expectations and are subject to inherent uncertainties, risks and assumptions that are difficult to predict. Factors that could cause actual results to differ include, but are not limited to, risks and uncertainties related to the risks inherent in biopharmaceutical product development. These and other risks and uncertainties are described more fully in the section titled "Risk Factors" section of the registration statement filed with the Securities and Exchange Commission. Forward-looking statements contained in this announcement are made as of this date, and MBX Biosciences undertakes no duty to update such information except as required under applicable law. Readers should not rely upon the information on this page as current or accurate after its publication date.
